UNIVERSITI TEKNOLOGI MARA
FINAL EXAMINATION

COURSE	PROGRAMMING I
COURSE CODE	CSC402
EXAMINATION	NOVEMBER 2026
TIME	3 HOURS

INSTRUCTIONS TO CANDIDATES

1. This question paper consists of the questions printed in this booklet.
2. Answer ALL questions in the Answer Booklet. Start each answer on a new page.
3. Do not bring any material into the examination room unless permission is given by the invigilator.
4. Please check to make sure that this examination pack consists of:
   i) the Question Paper
   ii) an Answer Booklet - provided by the Faculty
5. Answer ALL questions in English.

DO NOT TURN THIS PAGE UNTIL YOU ARE TOLD TO DO SO

This examination paper consists of 5 printed pages.

PART A (10 MARKS)

Answer ALL questions.

1. What does endl do?
   A. Declares an integer
   B. Writes a newline and flushes the stream
   C. Ends the program
   D. Reads a line

2. Which declaration creates an integer array of five elements?
   A. int a(5);
   B. array a[5];
   C. int a;
   D. int a[5];

3. Which statement immediately exits a loop?
   A. return 0
   B. cin
   C. continue
   D. break

4. Which values can a bool variable hold?
   A. any character
   B. any integer
   C. true or false
   D. any decimal

5. What does the % operator return?
   A. The square root
   B. The absolute value
   C. The remainder of integer division
   D. The quotient

6. Which term describes a finite sequence of precise steps that solves a problem?
   A. Compiler
   B. Variable
   C. Array
   D. Algorithm

7. Which declaration creates a floating-point variable named price?
   A. char price;
   B. bool price;
   C. int price;
   D. float price;

8. Which statement is most suitable for selecting among several constant cases?
   A. while
   B. for
   C. switch
   D. do...while

C Hak Cipta Universiti Teknologi MARA

9. How many times does a while loop execute when its condition is false initially?
   A. Zero
   B. Two
   C. One
   D. Until the user stops it

10. Which tool represents an algorithm using standard graphical symbols?
   A. Debugger
   B. Flowchart
   C. Compiler
   D. Pseudocode

PART B (60 MARKS)

QUESTION 1

This question tests high-level languages and debugging.

a) Define syntax error and logic error.

(3 marks)

b) Explain TWO advantages of high-level languages over machine language.

(2 marks)

QUESTION 2

A program reads a student's score from 0 to 100 and displays the grade: 80-100 A, 60-79 B, 50-59 C, 40-49 D, below 40 F.

a) Draw a flowchart for the grade classification.

(8 marks)

b) Write pseudocode for the algorithm and convert it into a complete C++ program.

(5 marks)

QUESTION 3

This question tests operator precedence and assignment.

a) Evaluate the following expressions: (i) 7 + 3 * 2, (ii) (7 + 3) * 2, (iii) 17 % 5, (iv) 17 / 5, (v) 17.0 / 5.

(5 marks)

b) Write C++ statements to declare two integers a and b, read their values, and display their sum, difference, product and remainder.

(6 marks)

QUESTION 4

Study the following nested loop:

```
for (int i = 1; i <= 3; i++) {
   for (int j = 1; j <= i; j++) {
      cout << j;
   }
   cout << endl;
}
```

a) Trace the program and show the exact output.

(10 marks)

b) Identify TWO logic errors in a version that prints four rows but reuses j without resetting it. Rewrite the corrected code.

(5 marks)

QUESTION 5

A shop stores the prices of five items in an array.

a) Declare an array named prices with the values 20.5, 55.0, 15.9, 75.0 and 10.0. Display all values.

(6 marks)

b) Write a program segment that applies a 10% discount to prices above RM50 and stores the results in a second array. Display both arrays.

(10 marks)

C Hak Cipta Universiti Teknologi MARA

PART C (30 MARKS)

QUESTION 1

A bookstore records up to five books. Each book has a title, price and quantity in stock.

Define a struct Book. Write a complete C++ program that reads the records, calculates the total inventory value, and displays the title of the most expensive book.

(15 marks)

QUESTION 2

A bookstore records up to five books. Each book has a title, price and quantity in stock.

Define a struct Book. Write a complete C++ program that reads the records, calculates the total inventory value, and displays the title of the most expensive book.

(15 marks)

END OF QUESTION PAPER
