UNIVERSITI TEKNOLOGI MARA
MARKING SCHEME

COURSE	:	INTERACTIVE MULTIMEDIA
COURSE CODE	:	CSC413
EXAMINATION	:	NOV 2026 (MOCK)
TIME	:	3 HOURS

MARKING SCHEME NOTES

1. This marking scheme accompanies the CSC413 mock paper (NOV 2026). Answers show the expected marking points; all questions are deterministic and paper-derived; no lecture slides are used.

2. Marking points show the expected answer and the allocation of marks; unresolved slots would remain visible.

3. Part A = 15 x 1 mark; Part B = 15 x 1 mark; Part C = 30 x 1 mark; Part D = 4 x 10 marks; total = 100.

4. Questions: 64. Slots: 72. Placeholders: 0. No LLM call. Questions and answers are for local study use only.

5. Structure derived from 15 unique CSC413 past papers; no past-paper text is copied.

FOR MARKERS' USE ONLY

This marking scheme consists of 6 printed pages

PART A - ANSWER KEY

Q	Ans	Statement	Explanation
A1	TRUE	Card-based authoring tools are best for messages with a clear beginning and end.	Cards support sequential navigation.
A2	TRUE	A prototype is an early model of a product.	Prototypes test ideas before production.
A3	TRUE	CMYK is used for printed output.	CMYK is a subtractive print model.
A4	FALSE	A hyperlink can link only to another web page, not to a file.	Links can target files and other resources.
A5	TRUE	Interactivity gives users control over content and flow.	Interactivity is a defining feature of many multimedia products.
A6	FALSE	A linear presentation allows users to choose their own path.	A linear presentation follows a fixed sequence.
A7	FALSE	Higher resolution always means a smaller file.	Higher resolution usually increases file size.
A8	TRUE	A scanner is an input device.	A scanner captures documents into the computer.
A9	TRUE	A storyboard is a visual plan of a multimedia sequence.	Storyboards show the planned flow.
A10	TRUE	Sampling converts a continuous sound wave into digital values.	Sampling measures the wave at intervals.
A11	TRUE	A bitmap image is made up of pixels.	Bitmap images use a pixel grid.
A12	TRUE	Chroma key compositing replaces a colour background with another image.	Chroma key removes a selected colour.
A13	TRUE	A low-fidelity prototype is used to test the basic layout and flow.	Low-fidelity prototypes test structure.
A14	TRUE	Hypermedia combines multimedia with hyperlinks.	Hypermedia adds linked navigation to multimedia.
A15	TRUE	Tweening creates intermediate frames between keyframes.	Tweening fills the gaps.

PART B - ANSWER KEY

Q	Ans	Term	Definition
B1	I	Multimedia	integration of text, graphics, audio, video and animation
B2	D	Sampling	converting sound into digital values
B3	L	Scanner	input device that digitises documents
B4	H	Frame rate	frames displayed per second
B5	J	Virtual reality	simulated environment
B6	N	Linear multimedia	presentation without user control of sequence
B7	B	Bitmap	image made of pixels
B8	A	Hypermedia	linked multimedia elements
B9	E	Vector	image made of mathematical objects
B10	K	Browser	software that displays web pages
B11	M	Interactivity	user control over content and flow
B12	F	MIDI	standard for musical notes and instructions
B13	G	Keyframe	important frame in an animation
B14	O	Tweening	generating in-between frames
B15	C	Plotter	output device for large drawings

PART C - ANSWER KEY

Q	Ans	Correct answer
C1	A	Frequency
C2	A	A visual sequence plan
C3	D	Improves accuracy
C4	A	A video compression family
C5	C	Analog sound to digital values
C6	C	Draws alternate lines of a frame
C7	A	Structure web content
C8	C	It combines visuals and sound
C9	B	Play while downloading
C10	C	Automatic device recognition
C11	D	A cinema presentation
C12	D	Along a predefined route
C13	C	One shape into another
C14	A	Links to other content
C15	D	Another resource
C16	D	Small strokes at character ends
C17	D	Plotter
C18	D	Vector
C19	C	Smooth jagged edges
C20	B	Frames per second
C21	D	Scanner
C22	B	Space between individual character pairs
C23	A	Compiler
C24	C	Card-based
C25	A	Pixels
C26	C	An early model of a product
C27	B	Drawing each frame by hand
C28	D	Permission to use a work
C29	C	Assemble multimedia elements
C30	B	Important frames in an animation

PART D - WORKED ANSWERS

QUESTION 1

Topic: web hypermedia

A museum wants a website that presents its collection and lets visitors explore related exhibits.

a) State TWO differences between linear and non-linear navigation.

Linear follows a fixed sequence; non-linear lets users choose their own path.

(2 marks)

b) Describe TWO roles of hyperlinks in the website.

They connect related exhibits and let users move between pages.

(4 marks)

c) Explain how streaming and compression affect multimedia delivery on the web.

Compression reduces file size for faster transfer; streaming lets audio or video play while it downloads.

(4 marks)

QUESTION 2

Topic: design project

A shopping complex requires a kiosk that gives customers location and retailer information.

a) State TWO important project team roles for completing the kiosk.

A project manager and an interface designer are important roles.

(2 marks)

b) Design a low-fidelity prototype for a pre-school courseware home page. The page must show topic menus, the course title and the school logo.

A simple sketch with a title, logo and large topic buttons is sufficient at low fidelity.

(3 marks)

c) Discuss TWO factors that lead to the wide use of mobile devices in games and shopping applications.

Portability and constant connectivity make mobile devices convenient for games and shopping.

(5 marks)

QUESTION 3

Topic: text

Text is an essential element in a multimedia project. Its shape, size, design, colour, arrangement and linking all affect the message.

a) State TWO reasons sans serif is mostly used for screen display and serif is used for printed material.

Sans serif is cleaner at screen sizes; serif aids reading in print.

(3 marks)

b) Describe TWO roles of hypertext in multimedia.

It links related content and supports non-linear navigation.

(3 marks)

c) Explain how text can have a massive impact on an informative multimedia project in the link and HTML context.

Clear headings and links guide users through HTML pages and make the information easier to scan and follow.

(4 marks)

© Hak Cipta Universiti Teknologi MARA

QUESTION 4

Topic: authoring interactivity

A company wants an interactive product demonstration that runs on a kiosk and on the web.

a) State TWO features to consider when choosing authoring software.

Interactivity support and export formats are important features.

(3 marks)

b) Explain the interactivity level suitable for the demonstration.

A medium level with menus and buttons lets users explore without overwhelming them.

(3 marks)

c) Explain TWO authoring tool categories appropriate for this project.

Card-based tools suit structured screens; timeline-based tools suit animation and media sequencing.

(4 marks)

END OF MARKING SCHEME
