(2 marks)

c) Normalize the table until third normal form (3NF). Show all the steps taken.

(16 marks)

QUESTION 4 **(20 marks)**

Based on the relational schema used in UiTM Sport Unit, write SQL commands for the following questions.
BRAND (brandID, brandName)
BOOKING (bookID, equipID*, studID* bookDate, returnDate)
STUDENT (studID, studName, studAddr, studPhone)
EQUIPMENT (equipID, equipName, equipPrice, category, brandID*, quantity, supplier)

a) Create BOOKING table.

(3 marks)

b) Increase equipment price by 10% for all equipments in the Sport Unit.

(3 marks)

c) Change the width of student address column to 50 characters.

(3 marks)

d) Display the equipments that are supplied by Al-Ikhsan which fall under the category either racket or ball. Sort the results based on the categories ascendingly.

(3 marks)

e) Find equipments that have not been booked by any student.

(4 marks)

f) Determine how many types of equipment are under each brand and display only the brand that carriers more than five types of equipment.

(4 marks)

QUESTION 5 **(20 marks)**

UiTM is planning to develop a volunteer management system for a better coordination and reporting for the volunteerism activities. As a database designer, you are assigned to design the database system according to the following requirements:
- Any student or staff can be a volunteer.
- Each student or staff can fill only one entry form. The details are volunteer ID, register date and total hours of working.
- Volunteer can volunteer in more than one projects.
Each assigned project will have details about start date, end date, hours, station and status.
Each assigned project also will lead by one faculty.
Each project will have their own project ID and project name such as trash clean up, money donation, animal shelter and others.

Based on the given information:

a) Construct an Entity Relationship Diagram (ERD) complete with all of the required tables, attributes and relationships using the Crow's Foot notation that reflects all of the given business rules.

(16 marks)

b) Identify TWO (2) relevant information that you can get from the ERD you construct in (a). Briefly explain your answer.

(4 marks)
